

There are no transitional fossils.

Organisms adapt to their environment.

Biologists "believe" in evolution.

Humans evolved from monkeys.

Charles Darwin developed the theory of evolution

Evolution is JUST a theory.

If evolution can be disproven, creationism must be true.

Carbon dating is not accurate; therefore the age of the Earth cannot be determined.

According to the 2nd Law of Thermodynamics order cannot come from disorder (entropy), so evolution is a false idea.

Only atheists accept the Theory of Evolution.

There is scientific evidence that dinosaurs and humans coexisted.

No one has ever seen evolution happen.

Disagreements among evolutionary biologists show how little solid science supports the theory of evolution.

Creationism is a valid scientific theory and should be presented with evolution.
